Foreword

Mangrove represent a rich and diverse living resource. Mangrove forests are now recognized as being a major protector of coastal environments and a valuable national economic resource. Nowadays, the awareness of coastal communities to the importance of mangrove forest conservation has been increasing. However, the total area of mangrove forests in Indonesia has been declining due to human activities. The government of Indonesia has taken various initiatives to address the problems of mangrove forest resource degradation including replanting of degraded mangrove areas, and establishment of greenbelts along the coast line with local participation for the protection of coastal resources. It is, therefore, essential for us to develop appropriate sustainable technologies for mangrove rehabilitation.

In this respect, the Ministry of Forestry of Indonesia and Japan International Cooperation Agency have implemented the ‘Development of Sustainable Mangrove Management Project’ hand in hand as a technical cooperation project. This Handbook is one of the project outputs and it provides fundamental information to study mangroves and understand the mangrove management in Indonesia.

I hope that this Handbook will be of use to all mangrove management projects and other people involved in mangrove rehabilitation activities in Indonesia.

Director General of
Reforestation and Land Rehabilitation
The Ministry of Forestry, Indonesia

Acknowledgment

The authors would like to express their appreciation to the people and governmental organizations who have assisted in many ways the production of this book. Ir. Soedjadi M., former Director of the Directorate of Reforestation for the Ministry of Forestry, Indonesia, for keen appreciation and encouragement; Dr. Marta Vannucci, Vice-President of ISME, for help in production of this book and proof reading; Drs. Suhardjono, Herbarium Bogoriense, LIPI, for kind help on taxonomic matters; Fred B. Eiseman, Jr., for sympathetic and timely encouragement and for great help in proof reading the manuscript; Sarita J. Newson for help in proof reading; Osamu Sasaki, Team Leader of the Development of Sustainable Mangrove Management Project (the Mangrove Project), Ir. Harijoko SP, Head of BRLKT VII Bali, Project Coordinator of the Mangrove Project, Ir. Kristanto, former Head of KANWIL Kehutanan Bali, Ir. M. Ridwan, Head of KANWIL Kehutanan Lombok and Ir. Suhartadi, Head of Sub-BRLKT Dodokan Moyosari, for their permission and support for field work; Wawan Suryawan, Staff of the Bali Barat National Park, for help in field work; Hideki Hachinohe and Keisuke Taniguch, for providing the information about planting techniques; Minoru Miyasaka, for assistance in the production of this book; Raka Sudana, Daisuke Nakamura, Hidco Ishida and Chiho Kitamura, for their patient assistance in preparing the materials; Hiroyuki Hatori, for timely help and encouragement; Husni, Agus and all the people of Siola Cottage, our base-camp in Lombok, for great help in field work at mangrove forests around Sambelia. Last but not least thanks are due to Ms. Nozomi Oshiro and ISME Secretariat members for their unfailing support.

Finally to all the staff members of the Mangrove Project in Bali and Lombok, many thanks for encouragement and support in field work and production of this book.
